

Ledyard Public Schools

Administrative Offices

March 17, 2020

Dear Parents/Guardians:

Ledyard Public Schools has worked collaboratively with other districts in the region to create optional learning activities for students to use during these extended school closures. This approach is similar to the optional summer learning activities many families choose to access. The resources are another opportunity for parents to provide skills-based practice to reinforce core academic content as well as engaging and authentic tasks to encourage students to problem-solve.

The resources can be accessed on the district website: www.ledyard.net. We have also included links to free online educational resources. If parents choose to utilize these optional activities and resources, we recommend that their children be encouraged to select activities that are of interest.

I will provide additional updates about learning activities in the coming days as we build our capacity to support parents and students during this extended closure.

If you do not have access to a computer or internet service, please call 860-464-9255 to arrange alternate support.

Sincerely,

Jason Hartling
Superintendent of Schools
